

FAASTeam presents:

Top 5 Tips for Safer Instrument Flight

Every pilot is concerned with safety. Instrument pilots operate in less-than-perfect weather and take on additional training and procedures to ensure their safety. Are you a safe instrument pilot? You do thorough weather briefings and flight planning for each trip. You have a solid set of personal minimums and stick to it. Is that enough? What else can you do to make your IFR flights safer? CFI, author, and international podcast celebrity Jason Miller has conducted extensive research on the topic of single-pilot IFR flight. Like others, he has concluded that standardization is a large part of the difference between the safety record of commercial operators and that of GA pilots. Jason collects and compiles Standard Operating Procedures (SOPs) for single-pilot IFR flight, and in this seminar, Jason is eager to share with you his top five tips for safer instrument flight. Jason Miller has been teaching flying full time for the past 12 years. He is the creator and host of the popular podcast "The Finer Points of Flying." If he's not in the air or hosting a podcast session, Jason can be found authoring ibooks or iOS training applications. San Carlos Flight Center was voted Best Flight School in the US in the 2013 AOPA Flight Training Excellence Awards. We are committed to promoting safety in general aviation

Event Details

Wed, Sep 17, 2014 - 19:00 PDT

San Carlos Flight Center

655 Skyway Rd

Suite 215

San Carlos, CA 94070

**Contact: San Carlos Flight Center
(650) 946-1700**
